Project

Generative AI
2024

Built a Generative AI platform using React, Python, and Bootstrap. Features include AI-driven text generation, image synthesis, and a responsive UI for user-friendly interactions.

Code Editor
2024

Developed a responsive code editor using HTML, CSS, JavaScript, and Tailwind CSS. Features include syntax highlighting, real-time code preview, and a customizable user interface for efficient coding.

Food Ordering
2024

Created a responsive food ordering website using HTML, CSS, JavaScript, and Tailwind CSS. Features include a dynamic menu, user-friendly navigation, and an interactive cart for seamless order placement.
